Re: Amendment to Exploration Project, Summo USA Corp. Lisbon Valley Project, M/037/088, San Juan County, Utah

Dear Mr. Gochnour:

The Division has reviewed your facsimile received on October 20, 1999 regarding proposed changes to Summo's drilling project currently underway at the Lisbon Valley Project. As discussed with you over the phone on October 20<sup>th</sup>, the Division would handle these changes as an amendment to the currently approved exploration project located within the large mine operation permit area.

Your letter described the proposed changes as exchanging one hole location on State land for a new location, also on State lands. The proposal is to locate drill hole "B" approximately 500 feet to the east of drill hole "A." The proposed change will not increase the number of drill holes, or create additional surface disturbances requiring reclamation. The Division has no concerns with the proposed change, and Summo has Division approval to proceed with drilling at the amended site.

Thank you for your notification of these changes. If you have any questions please contact me at (801) 538-5267.

Sincerely,

Anthony A. Gallegos  
Senior Reclamation Specialist
